## PROJECTS

### Online Voting Using Blockchain Technology

- Experienced in leveraging blockchain technology with Solidity, Truffle, and MetaMask.
- Proficient in designing, developing, and deploying smart contracts and decentralized applications.

### Shopping Cart App

- Developed a shopping cart web application using HTML, CSS, and JavaScript.
- Designed and implemented a responsive user interface that allows users to browse products, add or remove items from the cart, and view real-time cart updates.
- The project demonstrates practical use of JavaScript for DOM manipulation, event handling, and dynamic UI updates without reloading the page.

### General Management System

- Developed a general management system for maintaining and displaying patient records. The system allows for efficient management of patient data, including personal information, medical history, and appointment details.
- Designed a user-friendly interface for healthcare providers to easily access, update, and manage patient records.

---

## INTERNSHIP

### Navadhiti (Web Development)

Jan 2025-Present

- Worked on the front end of web applications, collaborating with senior developers, designers, and product managers to build and maintain responsive and efficient web applications.
- I worked on a school management system project, where I implemented offline support for the website using service workers

---
